Summary

Javascript Developer, familiar with the following stack:

- Frontend: html5, vanilla javascript, React.js, Redux, Next.js, sass.
- Backend: Node.js, express.js, serverless, AWS, MongoDB.
- Transversal: Javascript, testing, git.

Side-projects:

- Sony Music: "Fuego! - Estopa" (2019) & "La Boca Junta - Melendi" (2021) videogames. I participated in the development of 2 games with Phaser.js (canvas based Javascript library) for 2 musical bands. This games were part of a marketing campaign for the album release of each band.

Experience

Full-stack Javascript Developer

Sopra Steria

Jan 2020 - Present (2 years 3 months +)

Main functions:

Javascript developer in a Chatbot application (food and drink company). I've participated in features, maintenance and spike tasks, both in frontend and backend.

General technologies:

- Programming language: Javascript. Also used Typescript in some parts of the app and Bash for scripts.
- Version control: Git & Gitlab.
- Unit and integration testing: Mocha, chai, jest and Sinon (Mocks and stubs).
- Package manager: yarn and npm.
- Code lint: ESLint.

Frontend technologies:

- Vanilla javascript.
- Frameworks: React.js (with Redux).
- Styling: CSS, Sass.

Backend technologies:

- Runtime environment: Node.js.
- AWS (Serverless computing): CloudWatch (logs), Lambda, S3 and DynamoDB.

Methodology: Scrum (Agile software development).

Javascript Instructor Assistant

ISDI Coders

Oct 2019 - Jan 2020 (4 months)

Main functions:

I assisted the main instructor on a Part-time JS Bootcamp. Essentially, I gave support to the students on:

- Exercises and projects.
- Version control (Git & Github) and tech-team collaboration.
- Good coding practices: Clean code, testing and debugging.

Technologies:

- HTML / CSS / SASS / ES5 / ES6
- React (Context & Hooks) / Redux / Next.js
- Git & Github
- Node / npm
- TDD / Jest / Enzyme
- Firebase
- Eslint

Full-stack Javascript Developer

IAM Technologies

Jul 2018 - Jan 2020 (1 year 7 months)

Main functions:

Javascript developer. I helped building web projects in javascript for several clients (clothing store, restaurant, radio station, etc.).

General technologies:

- Programming language: Javascript.
- Version control: Git & Bitbucket.
- Unit testing: Mocha and chai.
- Package manager: npm.
- Code lint: Eslint.

Frontend technologies:

- HTML5
- Styling: CSS, Sass.
- Frameworks: React.js (with Redux), Next.js (for SEO).

Backend technologies:

- Runtime environment: Node.js.
- Backend framework: Express.js.
- Databases: MongoDB and DynamoDB.
- ODM: Mongoose.
- AWS (Serverless computing).

Methodology: Mixed (Agile kanban & Waterfall).

ISDI Coders

Mar 2018 - Jun 2018 (4 months)

Main functions:

Student in a Javascript MERN stack bootcamp (12 weeks). The first half of the bootcamp was centered in learning HTML, CSS, Javascript and React Framework. The second half, was focused in learning how to utilise an API, a database, Node.js and Express.js. Finally, we integrated all this knowledge on a final project.

Final project:
